

# PROGRESS IS OUR BUSINESS... **NOT** AN AFTER THOUGHT.

- Water reclamation via crossflow filtration
- De-carbonisation technology trials via the re-use of CO2 from fermentation
- Investment program into renewables
- Commitment to ESG Statement 2022-2027

# ESG STATEMENT 2022-2027

This Environmental, Social and Governance (ESG) Statement will guide Gypsy Hub in relation to the diverse and complex nature of environmental, social and governance issues and strategies.

- Continued leadership in sustainable development through ongoing research and trials of the latest global technologies
- Establishing a de-carbonisation target for all beverage production and processing
- Enhance water reclamation program via use of world-leading crossflow filtration
- A commitment to a circular economy approach to production operations and resource use
- Continued workplace safety controls that respond to employee input while maintaining compliance with state and federal standards
- Leading in organisational gender equity, diversity, inclusion and mobilising expertise in support of positive social transformations
